CONSTRUCTIVE SOLUTIONS FOR BUSINESS

In 1999, Patrick Baker saw an opportunity to bring technology solutions to the construction and real estate industries in the form of systems that streamline business processes. As founder of Constructive Solutions for Business Inc., Baker's team specializes in supporting companies in the construction industry realize increased profits.

"By integrating financial and operations software seamlessly with our clients' existing business processes, Constructive Solutions pulls everything together to achieve a streamlined, single-source control that allows for accurate reporting and increased efficiency", says Baker.

Based in Vancouver, with 16 employees, Constructive Solutions has had successful implementations in over 350 companies who depend on the complete suite of financial and operations software every day.

In addition, they offer local training classes as part of their dedication to giving clients a solid return on their software investment by expanding their knowledge and heightening productivity.

As Canada's premier provider of software solutions to the Construction and Real Estate industry, Constructive Solutions provides sales, support and implementation services for industry leading products which are currently being used in numerous companies nationally.

Due to increased demands of the industry, Constructive Solutions has evolved in their range of product offerings that reflect the specialized needs of the AEC, Commercial, and public sectors.

CSFB has expanded their comprehensive solutions to include estimating, project accounting, project management as well as property, service and facility management.

Their goal is to manage the entire project life cycle from plan through to operation.

Constructive Solutions Professional Services helps clients to accelerate the utilization and return on investment

of management processes and tools through an intelligent, well-designed implementation strategy and experienced professional support.

This includes a commitment for complete knowledge transfer both during and after the implementation process to enable the client's organization to smoothly transition from the Constructive Solutions Professional Services team. Planning, Design, Piloting, Rollout and Go Live Support are all key phases of our structured implementation plan.

Their Implementation Approach is driven by a careful evaluation of the client's needs. The typical implementation plan is phased to realize the maximum value from the client investment early in the process and is balanced with a realistic appraisal of available resources.

"The collective knowledge and skills of our team has established us as the leading provider of solutions to the industry – and has led to our success over the past ten years", says Baker.

Constructive Solutions' services include planning implementation consulting, custom report and inquiry development, procedure manual development, application development, IT network services and system integration to assist each company in achieving their corporate goals in a timely and effective manner.

The Value of our Partnerships

Having established themselves as the largest provider of Sage Timberline Office Software, Constructive Solutions' has now extended its offering to match the sophistication of the industry's requirements.

It has recently partnered with Meridian Software, developer of Prolog, the leading provider of project controls.

Mission Statement
Implementing leading business management software with trusted sales and exceptional service to construction and real estate customers in British Columbia and beyond

Patrick Baker

According to Baker, "we act as partners by working with our clients to find solutions and achieve their goals through ongoing training and support. *We measure our success in the success of our customers.* Our diverse industry experience gives us a distinct advantage, enabling us to custom-design solutions that help each client achieve profitable business growth".

Through our unrelenting commitment to service, we ensure that our customers have the training and knowledge they need to maximize their success" said Baker.

FEATURE COMMUNITY PARTNER

BLADERUNNERS – A PARTNERSHIP OF COMMUNITY & YOUTH

In a fast-paced construction industry, employers need trained, ready-to-work people that you can count on to be there. You are constructing more than a building, you are building a team. Constructive Solutions for Business, along with many of our clients continue to support BladeRunners and encourage others in the industry to do the same.

BladeRunners was created in 1994 during the construction of GM Place in Vancouver. It was founded with the purpose of matching construction needs with opportunities for Inner City disadvantaged 'street-involved' youth. Since for at-risk youth, most of the problems occur after working hours, a system of 24/7 support from BladeRunners co-ordinators was developed which led to the award-winning BladeRunners Model. After two more years, the Province of British Columbia began formally supporting the program and took on a stewardship role. The Aboriginal Community Career Employment Services Society (ACCESS) became a major funder of the program in 2002 and is now currently the contracted provincial manager. Besides being a funder and manager of the program, ACCESS is also a delivery agent in Vancouver's Downtown Eastside. The BladeRunners program currently is delivered by six delivery agents and has expanded into 10 different cities.

It is with partner involvement in the program that makes the BladeRunners projects a great success. To become involved call BladeRunners today and learn more about the different way you can help your community.

SAGE TIMBERLINE OFFICE

The people behind Sage Timberline Office products and services are inspired by creating integrated solutions that are able to flex, adapt, and evolve to help businesses expand and grow.

Sage Timberline Office – Sharpening your Competitive Edge

Sage Software understands that the software you choose for your business must help your company thrive, not merely survive. Sage Timberline Office helps companies streamline and accelerate every phase of the facility lifecycle – from a building's earliest conception through occupancy and deciding when to sell. More than 30,000 contractors and real estate professionals have selected Sage Timberline Office since it was first developed. Sage Timberline Office offers customers innovative software, reliable service, and a steadfast commitment to a long-term technology partnership.

Beginning in 1999, Sage Timberline Office set out to provide clients with precedent-setting customer care. By the next year, the Software Support Professionals Association (SSPA) awarded Sage Timberline Office its prestigious STAR Award for the Most Improved software support organization. By 2001, Sage Software became the first software company serving either construction or real estate to earn the Support Center Practices (SPC) Certification for Excellence, an indicator of Sage Software's level of support rated among the best 100 software companies worldwide. The performance reflects a dedication to providing customers with a level of support that is second to none.

Sage Timberline Office - Flexible and Integrated to meet your needs

With solutions for the entire facility lifecycle – from designing and building to sales and managing occupancy, Sage Timberline Office is created to work the way you work. An integrated family of construction management and real estate management software gives you a cross-functional system to pull everything together for streamlined, single-source control.

Backed by more than 30 years of proven dependability and award-winning support, today's full range of software applications integrates the operations side of your business with the financial team. This Sage Timberline Office integration eliminates the re-keying of data and increases operational efficiencies.

Sage Timberline Office's modular design means you choose just the software you need. The whole system is engineered to flex and adapt as your company grows or your focus changes. And whatever software elements you choose, Sage Timberline Office ties the whole thing together - start to finish.

Accounting – For contractors and real estate developers, accounting automates the entire building process to help control costs and boost revenue. For real estate professionals, the accounting suite allows you to report information in any format requested by owners, investors, and lenders. From accounts payable and job costing to change orders and commitments, Sage Timberline Office gives you easy access to information and lets you customize the software to meet your individual business needs.

Estimating – This full line of software application streamlines the entire estimating process, from the conceptual estimate to final bill of materials. Proven to reduce estimating time by 50% or more, the software offers accurate takeoff tools, a variety of analysis capabilities, presentation quality reports, and more.

Project Management – This application lets you view it all and keep the right people well informed at all times with access to up-to-the-minute costs, contracts, and document information. Open yet secure, you decide who can pull up data, run a report, or add input. Through integration with accounting, estimating and purchasing software, you're able to issue and see all subcontracts, change orders, purchase orders, and other project-related documents.

Service Management – This complete system puts you in control of field purchasing, service agreements, and warranties, as well as preventive maintenance. Thanks to full integration with accounting and service management applications, ready access to data enables you to track and improve your response to service needs.

Property Management – The Property Management software is a lease management system that handles any lease agreement no matter how complex. Use Residential Management to improve on-site operations and simplify home office accounting. Combined with accounting you'll be well equipped to proactively manage commercial, industrial, retail, and residential properties for a stronger bottom line.

Reporting Tools – Your software system is only as valuable as the information you can pull from it. Sage Timberline Office's intuitive desktop, customizable reports and interactive inquiries provide instant, onscreen access, and downloads in a hurry.

THE CLIENTS WE SERVE

Our clients range in size and type of business including general contractors, homebuilders, land development companies as well as subcontractors

We specialize in the following market segments:

- Commercial & Industrial Contractors
- Real Estate Managers & Developers
- Residential Builders

• Service & Specialty Contractors including:

*Electrical – Mechanical – Excavating – Refrigeration
Concrete - Restoration – Heavy Highway – HVAC
Drywall – and many more*

Sage Development Partner Products

Sage development partners develop and support best-in-class solutions that integrate with Sage Timberline Office to provide an ideal management solution for all types of businesses in the construction and real estate industries. Working closely with software developers Sage ensures that you have access to the seamlessly integrated, end-to-end construction management solution that's exactly right for your business.

TimberScan is a paperless accounts-payable processing system that is fully integrated with the Sage Timberline Office AP program.

TimberScan enhances your AP system by adding highly customizable distribution, renewal, approval, and reporting system. Here's how it works: The right people get electronic invoices automatically. Purchase Orders, Packing Slips, Receiving Tickets, Lien Waivers and all other AP documents can be part of the automated approval process.

TimberScan is used by more than 5,000 Timberline users in over 275 companies. Our clients tell us that the approval process with TimberScan is 50% faster. It automatically routes to the right approver providing them with the invoice and all the supporting documents. The approvers have everything they need for a quicker approval process.

MyAssistant for Timberline Office is specifically designed for Sage Timberline Office, MyAssistant proactively identifies what needs to be done, determines who needs to be informed, and automatically performs the task. For example, MyAssistant can automatically identify vendors with insurance expiring in 30 days and send them a letter, send past due customers a list of their delinquent invoices, generate and distribute personalized reports on a regular schedule, and notify property managers when leases are about to expire.

MyAssistant uses Microsoft Outlook to notify who you want with the information you specify. Timberline data can be included directly in email, and Timberline users can receive links to Sage Timberline Office reports and inquiries. MyAssistant can also attach any type of file to an email, including reports personalized for the email recipient. And after email is sent, MyAssistant helps manage the status of each notification.

Office Connector Query and Write for Excel is a suite of Microsoft Excel integration products that integrate with Sage Timberline Office

Office Connector Query moves information from Sage Timberline Office to formatted Excel spreadsheets. With a click of a button, you can update user-defined spreadsheets to reflect current information for work in process reporting, bonding, financial forecasting, financial statements, rent rolls and more.

Office Connector Write allows users to move information from Excel to updatable fields in Sage Timberline Office. Financial budgeting, vendor record maintenance, job record maintenance, project management forecasting, and custom field maintenance are just some of the many powerful applications of this tool.

On-Screen Takeoff takeoff generates faster and more accurate quantity takeoffs with its cutting edge technology. On-Screen Takeoff can be used with traditional paper plans and a digitizer or with electronic plans. You can skip the costly blue prints and go 'paperless'.

Use your mouse (or digitizer pen) to quantify lengths, areas, volumes, and perform counts right on your computer screen! If you still use paper blue prints, On-Screen Takeoff® communicates with a digitizer for a truly competitive takeoff advantage.

Any construction trade can use this program as it for it is well suited for General Contractors, Sub-contractors and Project Managers alike. Eliminate the guesswork and put an end to countless hours of manual takeoff labor. Let On-Screen Takeoff simplify your takeoff process and give you confidence in your numbers.

PROLOG ► THE INDUSTRY STANDARD FOR SUCCESSFUL PROJECT MANAGEMENT

Prolog software delivers total project management control for construction projects by automating day-to-day tasks and processes, from project design to close-out.

By representing Prolog software, Constructive Solutions now offers a full range of complementary solutions to architecture, engineering and construction companies. "With industry leading project management software as part of our portfolio, we can grow our customer base, increase our skill set and offer more value as a one-stop solution provider to customers in Western Canada". *Patrick Baker, President, Constructive Solutions*

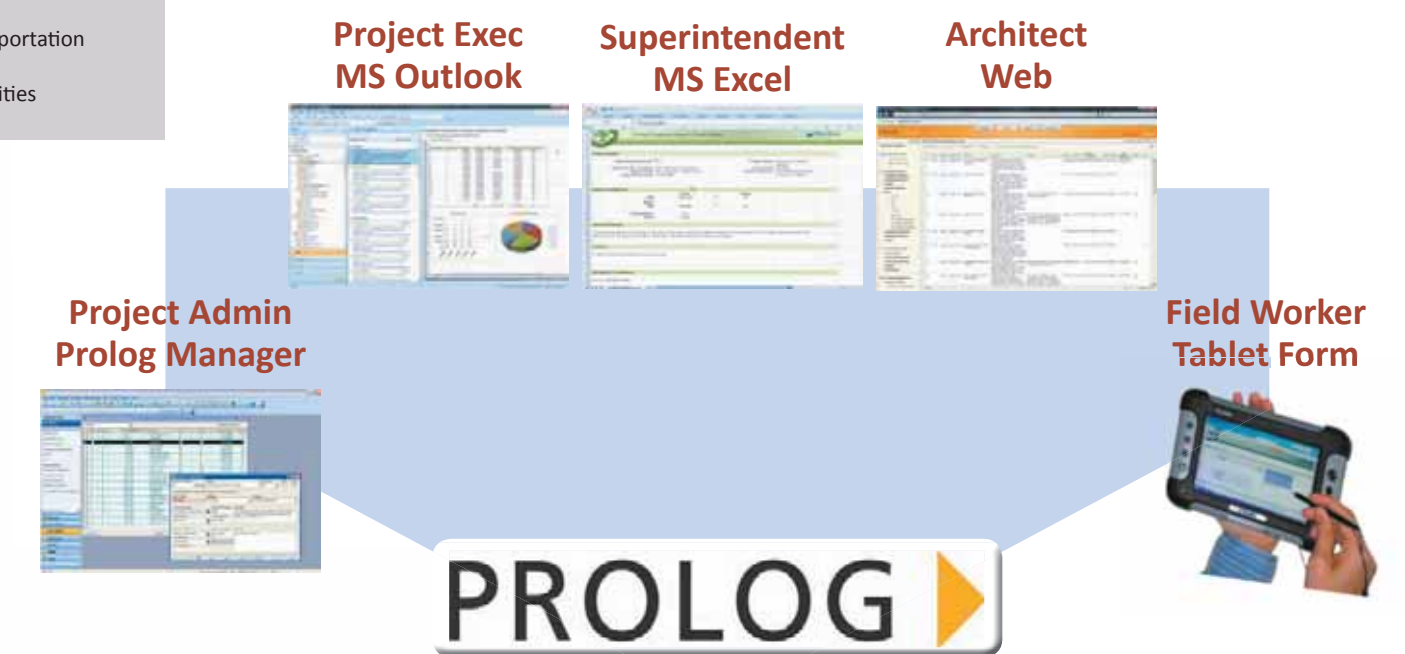

Prolog solutions can be deployed in a self-hosted or application service provider (ASP) environment. Prolog delivers in-depth **construction project management** features across projects and programs in the areas of: **collaboration, purchasing management, cost control, document management and field administration.**

As a complete construction management solution, Prolog enables you to:

- Manage **project collaboration workflow**
- Perform robust **construction project management**
- Reduce your project schedule by **collaborating** more effectively with your project team
- Manage **multiple projects** in one database
- Generate summary reports and queries across all projects
- Globally view all company projects to find trends and identify problems early
- Make critical decisions quickly using **accurate** corporate information
- Do more with less, and make your existing staff **more efficient**
- Standardize your project data and organization's business processes across all projects
- Audit projects for deficiencies and risk exposure
- Track key performance indicators (KPIs) to monitor all levels of company profitability, efficiency and performance
- Improve document control by streamlining the review process, tracking revisions and storing master files, including email records in a central project database
- Increase productivity with efficient data modification tools

It's About User Choices

PROLOG ► Converge

Prolog® Converge is a Web-based project management application that allows you and your project teams to collaborate more efficiently and gives you the flexibility to choose how you access critical project data.

As today's construction organizations, you face many collaboration challenges including how to bring extended project teams together across geographical locations, in online and offline environments, and across different technology systems and devices.

By providing a rich Web-based user interface on a powerful Web services platform, Prolog Converge allows project teams to collaborate more efficiently and gives users the flexibility to choose how they access critical information.

PROLOG ► Manager

Prolog Manager is a Windows-based project management application that automates daily construction processes, from project design to closeout.

Built on the Microsoft SQL Server database platform, Prolog Manager delivers robust performance and real-time visibility for managing construction projects and programs.

With features including collaboration, purchasing management, cost control, document management and field administration capabilities, Prolog Manager has become the industry standard for construction project control and transparency.

Prolog Web Services Platform

The "Powered by Prolog" advantage is a powerful platform that delivers choice and integration flexibility. Powered by Prolog means that your project-based organizations can access Prolog through multiple interface options including:

- a rich, Web user interface
- Role-based Microsoft Office Applications (OBA's)
- Mobile devices
- SharePoint portal application
- Integrations with other critical computing systems

Unlike traditional Web-based applications, the Prolog Web services platform allows you to exchange Prolog data with other systems while tightly maintaining data integrity, and adhering to the business logic, security settings and the system nomenclature established by your project-based organization. The Prolog platform creates new opportunities for you to integrate Prolog with third-party software, and to build custom applications or interfaces.

SYSTEMS

CLIENT SERVICES

Implementation Consulting

Constructive Solutions implementation process ensures effective implementation in a rapid time frame while maximizing knowledge transfer.

Constructive Solutions consultants direct a proven and phased approach that results in an effective information system with trained system champions.

We work with client implementation staff and stakeholders to map out and execute a strategy that ensures all of the corporate business objectives are met.

With the strength of Sage Timberline Office and our team of experienced consultants we are in a position to lead your organization through the implementation process to allow you to achieve your corporate goals.

Custom Report & Inquiry Development

Our extensive industry experience provides a foundation to assist clients in the development of custom reports and inquiries. We assist in identifying the objectives of reporting that are unique to each client and construct reports in a clear and concise format.

Application Development & Systems Integration

Constructive Solutions has the expertise necessary to assist clients with the design and writing of custom reports. With easy to use graphical report writers such as Crystal and Sage Timberline Office, Constructive Solutions will show you the most effective way of writing reports that fit your company's needs.

Timberline Client Training

We are dedicated to providing our clients a solid return on their software investment: expanding their knowledge, refined skills, and heightened productivity.

As part of our commitment we offer Sage Timberline Office client training on a regular basis. Attend our popular 'Controller's Course' or hone your 'Project Management' or 'Reporting' skills in one of our upcoming classroom or online classes.

CLIENT TRAINING COMMENTS...

"Without training you will only be using a very small part of the software's capabilities. Training will point you in new directions and show you areas where you can improve reporting, make entry easier, find errors more easily, and produce a more professional package."

Judy Dowdall, RAB Properties Ltd.

"One should consider this training because it teaches useful details you may not learn on your own. It also gives valuable tips on daily and monthly accounting details."

Maria Schinck, D. Robinson Contracting

CONSTRUCTIVE SOLUTIONS FOR BUSINESS

Information Technology Service Offerings

Constructive Solutions offers full a service Information Technology (IT) department. Constructive Solutions offers a fully integrated technology solution for your business.

In pursuit of our objective to be the single point on contact and accountability for all your business technology needs, we design, procure, implement, support and provide a comprehensive set of Network (IT) services for our clients.

Our services include:

- Installation, Migration and Troubleshooting of Sage Timberline Office
- On Site Network Evaluations and Audits
- Workstation and Server Configuration
- Technical Support and Troubleshooting
- Network Monitoring Services
- Help Desk Support

Customer Experience & Technology Audit

We take our customer relationships very seriously. We come to work every day understanding that without client loyalty and support we don't have a business. In 2009 we launched a program called the 'Customer Experience & Technology Audit'. This program has allowed us to reach out to every customer to ascertain their satisfaction with our products and services. It also allows clients to focus on their Constructive Solutions' experience and in turn allows us to learn how we can best serve client needs today and into the future.

A CLIENT AUDIT EXPERIENCE...

"The Customer Experience & Technology audit was a very helpful experience for our team. We got to air our issues and you quickly trained our estimators on the use of estimating and job costs. Our estimators are very satisfied with the training provided and said your consultant knows his stuff, and was a very good trainer."

STAFF PROFILES

Patrick Baker - President Patrick is President and Co-founder of Constructive Solutions. With over 25 years in professional sales, he has worked in a variety of technology based industries gaining the necessary perspective to guide clients to the solution that best meets their business needs. As President, Patrick is primarily focused on developing new clients, new team members and ensuring our core values are delivered through timely and professional consulting services.

Donna Baker - Manager, Marketing & Client Relations Donna joined Constructive Solutions in early 2002. With over 15 years experience in sales & marketing she is our front line for Customer and Client Relations. As the Marketing Manager, Donna oversees the design, implementation and maintenance of advertising, promotions and sales-force-driven campaigns. She continually develops creative and effective marketing plans for the products and services Constructive Solutions provides. Donna strives to maintain the highest level of satisfaction by fostering client and customer relationships.

Jamie McIntyre - Corporate Controller After working 10 years in the accounting field, Jamie obtained his CGA designation in 2005. In the fall of 2007 Jamie joined Constructive Solutions as their Corporate Controller. Jamie works closely with the President to ensure the company operates as efficiently as possible. He enjoys the challenge of working with a small business and is responsible for creating financial statements and management reports, processing payroll and administering the company's benefit plan. Jamie brings high value to the support and services offered to Constructive Solutions' clients.

Jeff Campbell - Mgr. Consulting Services, Sage Timberline Office Certified Consultant

As Manager of Consulting Services, Jeff participates in the selection and training of all new consulting hires within Constructive Solutions. As a CGA with many years experience in the construction and real estate industry, Jeff has become a very valuable asset to our company and clients alike. After obtaining his designation as a CGA, Jeff joined an Owner Developer as its Controller. He spent two years overseeing all the financial aspects of that company while learning Sage Timberline Office. Jeff then joined a property management firm in Vancouver as its Controller. Jeff joined Constructive Solutions in April 1999 and became a Certified Sage Timberline Office Consultant. Jeff guides his clients through the setup, training and implementation of Sage timberline Office Software. In addition, he provides valuable management-focused consulting with his strong understanding of the construction and real estate business environments. Jeff has been involved with clients ranging in size from small residential builder to large property management companies in Vancouver.

Bojan Topic - Sage Timberline Office Certified Consultant

Prior to joining Constructive Solutions for Business in January 2004, Bojan spent over five years with Conac Software Corporation as a System Implementation and Support Manager. Over the past 15 years he has been exposed to many 'Best Practices' from within the Construction and Real Estate industry. His main focus was systems design, training, deployment and customization with over 40 on-site implementations across Canada and US. In his consulting approach, Bojan places emphasis on the client's management needs as well as their existing processes in order to optimize procedures and accelerate the conversion process. Besides his extensive knowledge in the construction industry, Bojan brings an in-depth knowledge of the principles of system design and report writing to the Constructive Solutions' consulting team.

Kena Campbell - Sage Timberline Office Certified Consultant

Kena joined the Constructive Solutions team in 2004. Prior to joining Constructive Solutions she was with the Timberline Corporate Office for six years. Her 15 years of accounting experience made her a prime candidate for the Certified Timberline Consultant/Trainer program and she achieved this shortly after starting at Sage Timberline Office. Besides consulting, Kena was involved in various roles which included, support, application training for new hires, managing the accounts payable and systems support teams, presenting at user conferences and interfacing with the product group during the development process. Kena is certified in both Construction and Property Management. Her extensive knowledge of Timberline and her focus on customer satisfaction are key components that allow Kena's clients to successfully manage and grow their businesses. Since joining Constructive Solutions, Kena has been involved in implementations ranging from electrical and mechanical contractors to large development companies. During her tenure with Timberline her consulting work was diverse, with a focus on the Property Management sector.

Sara Montgomery - Sage Timberline Office Certified Consultant

Sara joined the Constructive Solutions team in 2005 and has brought experience in both accounting and software consulting. Previous work experience includes the role of Controller for a general contractor and prior to that as a staff accountant and software consultant for a local CA firm. Sara has been involved in accounting for construction for over 10 years and an overall accounting experience for over 15 years. Bosa Construction and Linwood Homes are just a couple of Sara's recent software implementations.

Darren Johnson - Business Development Specialist

Darren joined Constructive Solutions in early 2009 and is a recent Business and Marketing graduate from the University of the Fraser Valley. As the Business Development Specialist, Darren's primary role is to prospect, qualify and align sales opportunities within our organization. Darren is committed to increasing the exposure and awareness of Constructive Solutions' business management solutions in Western Canada.

Tereasa Land - Administration Coordinator

Tereasa (Terri) joined Constructive Solutions in the fall of 2008. Terri's skill set coupled with previous work experience in the specialty service industry provides her with knowledge and understanding of our clients and prospects alike. As the Administrative Coordinator for Constructive Solutions, Terri is involved with the implementation and execution of marketing campaigns. She also provides ongoing sales and administrative support to our team. Terri is dedicated to providing professional customer service in our goal to become the recognized leader of construction and property management software in Western Canada.

The Constructive Solutions team is one of the best in the industry. We have a dedicated staff that comes from a variety of business and accounting backgrounds to bring your company the professionalism and expertise it deserves. We believe our professional services group provides the critical factor in the successful implementation of business software.

Tavis Craik - Sage Timberline Office Certified Consultant

Tavis joined the Constructive Solutions team in March of 2007 bringing with him a breadth of knowledge that ranges from advanced accounting skills to computer programming. Prior to joining Constructive Solutions Tavis was the Controller for an Industrial Construction/Specialty Contracting Firm for 7 years. After a short period of time working with Constructive Solutions Tavis completed the necessary training to become a Sage Timberline Office Certified Consultant. From a Consulting perspective Tavis has experience working with Large Developers and Construction Managers as well as General Contractors and Specialty Contractors. He has successfully helped guide many of our clients through the challenges faced during the implementation of new accounting software. Using his advanced reporting writing skills he also helps new and existing clients get the most value out of their investment in Sage Timberline Office. As a professionally designated accountant Tavis brings a unique and meaningful perspective to the table combining his experience in the construction industry with his accounting and programming knowledge. This allows him to provide valuable management-focused insight to help our clients grow their businesses and prosper.

Jennifer Pringle - Sage Timberline Office Certified Consultant

Jennifer joined the Constructive Solutions team in April 2008 bringing with her more than 15 years of Specialty Trade Industrial Experience working with a major Mechanical Contractor. Jennifer has extensive experience in AP and AR Workflow, Non Union and Unionized Payroll, GL Workflow and Reconciliation as well as Contract Management, Job Cost and Project Management. Jennifer has also completed a number of independent Management and Accounting Consulting engagements ranging in topics from Human Resource Management, Team Building, Conflict Resolution, and Accounting Support. Her recent Implementations include CONform Construction, Reid Taylor Construction, ConVerge Construction and Spire Development.

John Yensen - Timberline Specialist / Network Engineer

John brings more than 11 years in computer systems and network administration to Constructive Solutions. He is experienced in multiple operating systems, including Windows 2000-2008, XP, Vista, Small Business Server, Linux and Macintosh. His professional accomplishments include network infrastructure design and implementation, active directory administration, Internet Security Acceleration, as well as website design, maintenance and administration. John's lists of certifications include Microsoft Certified Professional, Microsoft Certified Systems Administrator, Microsoft Certified Systems Engineer, and 3Com Certified Network Telephony Specialist (VOIP). With the addition of John, Constructive Solutions is now in a position to offer our clients a "One Stop Shop" for all your IT requirements. This will allow us to achieve our objective of providing a single point of contact and accountability for all your business technology needs.

2009 CONSTRUCTECH VISION AWARDS

These awards honor companies that have realized the advantages of applying modern technologies to their everyday businesses. In addition to honoring builders and contractors, Constructech magazine will also recognize the hardware and software suppliers that have enabled the construction company to achieve its goals. Integrated software helps to manage the scope, schedule, cost and changes for accurate accountability and timely reporting.

SILVER WINNER: 299 BURRARD DEVELOPMENT from Vancouver, BC
 Builder/GC Residential - \$26 Million to \$100 Million

with: **Constructive Solutions for Business Inc., Solution Provider**
Sage Timberline Office by Sage Software
Prolog Manager by Meridian Systems
Office Connector by Event 1 Software

299 Burrard Development wanted an integrated system complete with policies, processes, and procedures. The solution created integrates many top level software applications and was done in a multi-phased deployment starting with the core program, Prolog Manager from Meridian Systems. The group integrated Prolog with Sage Timberline Office accounting software with help from Sage's British Columbia business partner, Constructive Solutions for Business Inc. The integration project has given the Pacific Rim Construction office a comprehensive set of tools that offers complete control over all their project activities.

An Industry Partner

Constructive Solutions recognizes the important role construction industry associations play in improving the quality and growth of the industry. We are proud to be active participants, working with our industry partners to continue the success of this vital segment of our economy.

SAME GREAT COMPANY, BRAND NEW LOOK.

After 15 years as a quality civil construction partner with projects throughout much of British Columbia, we're pleased to introduce our new name and look. Our new brand embraces these roots and our ideals.
